Log in with an existing account

If you already have an account, click "Log in with existing account"

- The system automatically selects your current Country/Region or you can manually select your Country/Region.
- Enter your registered mobile number or email address and then enter the password to log into the APP.

Add devices

QR Code Connection

Tips: The device supports only 2.4GHz Wi-Fi, it currently does not support 5GHz Wi-Fi. The Wi-Fi password should not contain any special characters such as: !@#\$%^^&^!). During the configuration process, put your phone and the device as close as possible.

When the camera is turned on, you will hear the broadcast "Wait for the Wi-Fi configuration". If you do not hear this, reset the camera to factory settings.

Enter the 2.4GHz Wi-Fi name and password

Click "Continue" and keep the camera near your phone

Scan the QR code with your phone camera

EZ Mode Connection

Tap "+" or "Add Device" to add a device

Google Assistant And Alexa

Make sure this function has been enabled on your device

Precondition

- (1) Download and install the Google Home or the Amazon Alexa APP depending on your Smart speaker.
- (2) Register the account and pair your smart speaker with the APP.

Pairing Tuya Smart to the Smart Speaker APP

Connect your account to the Google Home APP. It supports Google Nest Hub, Chromecast Display etc.

Login into the Google Home APP, click on the right corner of individual settings--Assistant Settings -- choose Assistant --Home Control—Search the Tuya Smart APP, the page will direct you to the tuya smart login page. Enter your tuya smart app account and password and click "Authorise" to link tuya smart app with your Google Home APP. Then you will be able to see the devices supporting Google Assistant in your home device list.

Control your devices through the Google Home APP.

Here are some useful commands you can use with your smart camera:

- "Ok Google, show me the smart camera"
- "Ok Google, show me the IPC"
- "Ok Google, show me the security camera"
- And you could also give some familiar name to the device like front door, bedroom etc.
- "Ok Google, show me the front door /bedroom"

Connect with the Amazon Alexa APP. It supports Echo Spot , Echo Show 5/8/10 etc.

Log into the Amazon Alexa APP and tap on the menu in the left corner. Select skill menu to enter skill store – search Tuya smart – Click Enable button – it will direct you to tuya smart login page. Input your tuya smart app account and password – then say to Echo "Alexa, Detect devices" – then you will able to see the devices in your tuya smart app account.

Control your devices through the Amazon Alexa APP. Y ou can give the following commands to your smart camera:

- "Alexa, show me the smart camera"
- "Alexa, show me the IPC"
- "Alexa, show me the security camera"

FAQ

As mentioned before, there is a FAQ page in the camera settings and you can also read the Q&A below to have an overall understanding of the common issues.

Q1: How do I reset my camera to factory settings ?

A1: Delete the camera from your app list directly or long press the reset button for 8s until you hear the voice "Reset, camera reboot"

Q2: I have selected the 2.4GHz WI-FI and entered the password correctly – why does the camera still not connect to Wi-Fi?

A2: (1) Make sure the network you used is the same one for your phone and the camera. (2) Make sure your Router has enabled DHCP. You can log into the router settings to check it. If it is disabled, the camera will not detect the IP and fail. (3) Press the reset button for 8s to restart the camera. (4) Make sure the Wi-Fi signal intensity is over 80%.

Q3: How do I change the camera from one router to another?

A3: First delete the camera from your app list or long press the reset button for 8s. Then configure the camera again.

Q4: Why is the SD card not be recognized? After some time the video and video cycles cannot be recorded?

A4: Check the camera settings and make sure you set up the camera to record on your SD card. Make sure that the currently supported 128GB SD card did not exceed its storage capacity. Check whether the SD card is not damaged and supports only FAT32.

Q5: Why can't I receive the alarm notifications when I see the device online and there is a motion detection event ?

A5: Make sure you have enabled the push notification from the Tuya Smart APP. Enable alarm notifications within the app .

Q6: How do I access the camera using a browser?

A6: Open the page https://ipc.ismartlife.me/login and use your own Tuya app to scan the QR code, then you will see the camera on IE.
